

ACIC Recertification September 30, 2016

The names in yellow are the ones who have expired already. You can come to dispatch and the dispatchers will help you take the test. ACIC has changed their tests and they are very hard!!

The Level 2 people will need help taking the test!!! When you come to dispatch there may be times that the dispatchers are too busy to help due to our increasing call volume. But, once they are free they will help.

If you are in the expired list you will need to call ACIC at 800.482.5866 and ask for "Network Control." Tell them your password has expired and that you need your CSN number set to your password so you can re-cert.

When you login to take your test it will be CSN (User Name) CSN (Password), then it will prompt you to make a new password. You can use up to eight characters, a number and a special character. The characters can be all CAPS.

When you come to dispatch to take your test make sure you have your CSN number with you.

Carlos Pineda	09/01/16- Level 1 test	5501387

The ones who are at the academy just took the Level 1 class, and I know they have not had time to come into dispatch to take their test. Since your date shows to be expired you will also have to contact ACIC. Use directions above.

Last thing, we have an ACIC audit coming up in 2017 so, in December I will be sending out emails with lists of people who will be expiring January-April to prepare for our upcoming audit.

Thanks so much!!!!
